

# Data Lake Foundation

A Seamless Data  
Integration Package

Our Data Lake Integration Package leverages the power of **dbt** and **Snowflake** to provide a seamless data engineering experience. By implementing the medallion architecture, we ensure your data is organised, reliable, and easily accessible for analytics.

# Key Features

01

**Medallion Architecture:** Ensure data reliability and quality through a layered approach.

02

**dbt Integration:** Transform your data with ease using dbt's robust transformation capabilities.

03

**Snowflake's Performance:** Enjoy the scalability and performance of Snowflake for your data storage and processing needs.

04

**Single Source System:** Consolidate your data into a single, coherent source system.

05

**Sample Report:** Get a head start with a sample report showcasing the capabilities of our solution.

# Deliverables

## Software

Implementation of a data lake using dbt and Snowflake.

## IT Consulting

Data architecture based on the medallion strategy.

## Data Management

Integration and consolidation of data into a single source system.

## Data Analytics

A detailed report to demonstrate the system's analytical capabilities.

**Package Investment: \$49,990+GST**

A complete, end-to-end data solution tailored to your organisational needs in 4 weeks.
